

## MIGHTY I PERFORMANCE RESULTS

The following test results compare StarchTech's Mighty I packaging material against other loosefill products available in the market today. For cushioning purposes, tests concluded that our Mighty I packaging material out-performs 2 separate manufacturers of polystyrene loosefill.

The conclusion of overall strength, using a plunging device and measuring the amount of force with which the peanuts push back, reveals that the Mighty I product is 48% stronger than Styrene E, 97% stronger than the Figure 8 and 104% stronger than the Super 8 product.

Tests completed in October of 2009
